

## SPECIALISED PRINTER

A **three-station dot matrix printer**, for individual forms and two paper rolls (maximum width 70mm). The first station, with an **automatic tear bar**, is used to print receipts, the second station prints the journal and the third station prints transaction slips, inserted from the top or the front.

The **PR4 DR** offers advanced capabilities, **outstanding productivity** in printing and paper management, **low noise** level and high operating speed that makes it a **top performer** in its market class.

The Olivetti **PR4 DR** printer, prints on **individual forms** inserted from the front or the top of the machine and on two rolls. The capabilities of the **PR4 DR** make it the **highest performing printer** in its product class.

The **PR4 DR** also **reads CMC7 and E13B code lines** for rapid cheque processing and can be fitted with a multi-function board for direct management of two drawers and a customer display.

## DESCRIPTION

### Automatic management of supplies

With the **PR4 DR, cashdesk operations**, including replacement of supplies – paper rolls, ribbon cartridge – are quick and easy. This is because the **PR4 DR** ensures **safety and autonomy** at all times. Designed to enable the cashier to work with the **greatest of ease**, it offers a range of unique features: the **PR4 DR** is **the only retail printer with automatic slip alignment**, and the only printer that loads new paper rolls (for the journal and receipts) automatically.

### A broad range of applications

**Automation is a key** requirement in any **retail environment**: large department stores with a large number of cashdesks, super and hypermarkets with payout barriers, small shops where the cashdesk has been turned from a “receipt provider” into a small management system. Plus fuel stations where minimarkets are an increasingly common sight, hotels and restaurants, ticket offices, bank branches.

In all these environments, the **PR4 DR** can **handle any type of transaction**: receipts, sales forms, coupons, tickets, credit-card forms, cheques, invoices, withdrawal and deposit slips, currency exchange receipts. And if required, it will **record the details of each transaction** in a **daily journal** (complete with key).

## TECHNICAL SPECIFICATIONS

### GENERAL CHARACTERISTICS

|                                 |   |
|---------------------------------|---|
| <b>Technology</b>               | Dot matrix, 9 pins  |
